

## RoamSafe

## RoamSafe -

## An innovative compliance and archive solution for iOS

RoamSafe allows businesses to secure iOS devices outside the corporate network and ensure regulatory compliance is met for communications, web and application use.

This service ensures that highly regulated industries can manage iOS devices at all times and reliably enforce compliance and archive services. By implementing active controls on these devices an organization can prevent issues occurring in the first place – i.e. before a communication is posted to the internet or delivered to a recipient. The archive capability delivers full audit and review capabilities for eDiscovery.

RoamSafe delivers real benefits, including:

- Full user identity and metadata for each archived message
- Common policies for in and out of the organization
- Policy granularity and flexibility
- Group-based policies
- Accurate web and application filtering
- Unique Social Risk Management capabilities
- Full reporting and alerting
- Ease of deployment
- Integrates with MDM tools
- Best practice policy framework
- Easy to centrally manage

*More metadata and context have created new archiving headaches. To effectively archive social media conversations and ensure that the full intent and scope of social discussions are preserved, you have to capture additional data points that weren't necessary or didn't even exist in the past.*

Forrester Research - 'Market Overview: Social Media Archiving' - March 2015

The solution works with all iOS9 devices (in Supervised Mode). No Global Proxy setting changes are required. Netbox Blue also offers solutions for Windows laptops and Apple Mac OS X when used outside the corporate network.

Netbox Blue's Social Risk Management solutions have won international recognition with organizations around the world using the technology and a host of global awards. The technology is patented and integrated with leading Enterprise Archive Platforms.

Netbox Blue is a leading provider of innovative social media and internet compliance, management and security solutions.
